Image report

The `img` elements of the page are shown below categorized by their type of textual alternative. Please review that the images in each group match that group's definition.

No textual alternative available, not linked

The following images are not links and have no textual alternative available (no `alt` attribute), and are, therefore, not accessible to people who cannot see the images or understand the symbols in them. An image belongs here if the image is significant (non-decorative) and the markup generator doesn't have knowledge on what the image is about available. For example, a photo gallery generator does not have textual alternatives available when the user refuses to provide them. Purely decorative images should have the empty string as the textual alternative (`alt=""`), so it is a mistake for those to appear here. Also, when the markup writer knows what the images are about, (s)he should write textual alternatives.

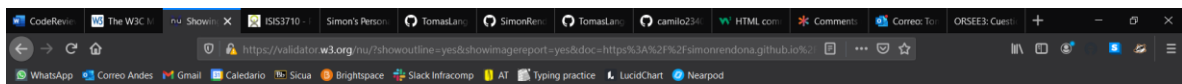

Image Location

From line 207, column 6; to line 207, column 169

From line 208, column 6; to line 208, column 165

Images with textual alternative

Java

From line 194, column 9; to line 195, column 42
